

Good day

we received your contact from one of our clients ,who said you are also interested on our products. Great thanks for choosing us here is our product , we have two options , as we are a farming company that specializes with pig farming

Option 1

We Farm the traditional way ,where you are able to visit a farm and buy a pig based on it weight ,so we would weigh it and sell it to you as per kg price of that time, our pigs are vaccinated and we'll looked after as we frequently be visited by a vet specialist and we make sure they're fed well with no excessive fat and our kg price is one of the very competitive price you can find in our kzn region.

Options 2

Our second option it's where we have introduced a "Metaverse Farm " where you can be able to Farm and own a pig but it a virtual pig ,meaning we would Farm on your behalf, you don't have to carry any risk of it as we would be doing all the job for you ,from vaccines to pig feeding, with regards to the virtual pig you get to buy it at an amount of R2200 once off and this pig will then be sold and you would then be able to make a profit of R500pm every month for a period of 12 months.

How is your profit guaranteed

So basically when you buy the virtual pig, you will then be owning that pig virtual meaning one of the pig at our farm will be belonging to you, it won't be a specific pig as that would mean you now have to carry the risk of its vaccination and feeding it ,in such a case where should it die ,you will then loose if it a specific pig, now that it not specific but virtual you will then be on the safe side that you would never hear from us telling you that we can't pay you out your R500pm due to a pig being dead, cos your one will never die.

How do we make our profit

We are a company that specializes in breeding pigs so it means that we breed pigs till they give birth of which a pig gives birth twice a year and a pig gives birth at a minimum of 6 piglets per time and in those piglets that where our company makes profit through selling these piglets to arbiters and some individuals butcher companies, through the sales of those piglets we then make a profit and from those profits margins its where we able to share or splits that profit with you and you're able to make that R500pm

Our Banking Details

Bank Name: NEDBANK

Acc No. 1246953366

Acc. Name: Piggy Trading Farm (Pty) Ltd.

Where or how all this money is generate

However we won't hide the fact that the company makes a lot of profit as the same pig you own virtual may give birth to a minimum of 10 piglets per year and those are the live piglets ,but we should also look at the fact that the company carries the risk and insurance of these animals as they're at the farm also the running cost of the company to all its employees that have to be paid at every month end, also considering the logistics of transportation of piglets to our abattoir where we generate our profits through the sales deal on bulk sales also we sell at the farm live pigs ,that our primary source of sales as well.

How to contact us
